Experience the OPTIMA: a new generation of lightweight, value for money gangplanks

7 January 2011

Southampton-based Calibra Marine International Ltd is delighted to announce the UK launch of the ultra lightweight OPTIMA gangway, representing excellent value for money and longevity for all types of boat owners.

Manufactured from strengthened polyurethane by hi-tech carbon gangway specialists GS Composite, the OPTIMA gangway utilises new technology and materials to provide a strong, lightweight solution with exceptional ease of use.

“You can finally replace your wooden gangplank, secure in the knowledge that the OPTIMA will provide an economical, lightweight and long-lasting alternative. Suitable for heavy use with zero risk of corrosion, even charter companies will be satisfied with the performance of the OPTIMA,” Calibra Marine Marketing Director, Trefor Jones, said.

The OPTIMA is the best price performance gangway on the market featuring a unique polyurethane anti-slip surface. Furthermore, the OPTIMA ensures owners full peace of mind as a state-of-the-art gangplank which is not only fully floatable but also eliminates the problem of corrosion or decay all too common in its wooden and metal counterparts.

The OPTIMA gangway is fully treated on all surfaces and is available in a variety of colours.

The Optima gangways are available in two sizes 220 x 35 cm and 260 x 35 cm and weigh 10 – 12 Kgs

Prices range from £630.00

View the OPTIMA gangway on stand D2 (Equipment and Fittings Hall) at the Tullett Prebon London International Boat Show 7-16 January 2011 at ExCel
